PROFESSIONAL SUMMARY

Enterprise Systems & Automation Architect with 4+ years delivering scalable automation, ERP integration, and analytics solutions across 50+ retail branches. I design and implement end-to-end systems — from Dynamics 365 ERP integration to real-time multi-branch dashboards — that eliminate manual overhead, accelerate decision-making, and unlock operational efficiency at scale. Experienced in building centralized operations platforms for multi-location environments including inventory management, order processing, and maintenance workflows — directly applicable to building and integrating ERP and SaaS solutions for the multi-branch retail sector.

CORE EXPERTISE

Enterprise Systems Integration

Multi-Branch Operations Platforms

ERP & POS Systems (D365, GoFrugal)

Inventory & Order Management Automation

Data Analytics & BI Dashboards

Digital Transformation

Workflow Automation

API & Systems Architecture

PROFESSIONAL EXPERIENCE

Enterprise Systems & Automation Architect | 01/2021 – Present

Orange Bed & Bath — Retail Group (50+ Branches), Jeddah, Saudi Arabia

- Led organization-wide digital transformation as Solutions Architect and primary technical owner for automation, analytics, and integration platforms across 50+ retail branches.
- Developed a showroom operations platform on Supabase enabling 50+ branches to browse product catalogs, submit stock replenishment orders, and log maintenance requests — with role-based access, real-time tracking, and audit logging.
- Designed and delivered a custom enterprise analytics dashboard integrating Dynamics 365 ERP, POS sales data, visitor counters, and operational KPIs — enabling real-time executive visibility and data-driven decision-making across 50+ branches.
- Designed and implemented end-to-end automation frameworks across sales, operations, warehouse, and maintenance workflows — reducing operational overhead and manual workload by over 80%.
- Built API-driven e-commerce synchronization engine connecting WooCommerce, Trendyol, and OTO to warehouse and fulfillment operations — accelerating order fulfillment workflows by 60% while reducing processing errors by 85%.
- Engineered a bidirectional integration pipeline between Dynamics 365 ERP and Trendyol marketplace — automating inventory sync, order processing, and data reconciliation across platforms.
- Built centralized reporting infrastructure using Python, Excel VBA, and Power Query — significantly improving reporting accuracy and eliminating manual reconciliation.
- Deployed internal maintenance ticketing system using React and Firebase with role-based access control, workflow tracking, and audit logging.
- Automated daily and monthly reporting pipelines, reducing report preparation time from several hours to minutes and enabling scalable operational visibility.

KEY PROJECTS

Enterprise Retail Analytics Dashboard

Designed and built a custom multi-page analytics dashboard integrating Dynamics 365 ERP, POS systems, visitor counters, and operational KPIs — with automated data refresh, Arabic/RTL interface, and PWA mobile support serving 50+ branches.

Technologies: Dynamics 365 · JavaScript · Chart.js · Power Query · ETL

Dynamics 365 ↔ Trendyol Integration Pipeline

Engineered a bidirectional integration pipeline between Microsoft Dynamics 365 ERP and Trendyol marketplace — automating inventory synchronization, order processing, and cross-platform data reconciliation with error handling and audit logging.

Technologies: Dynamics 365 · Python · REST APIs · ETL

Showroom Operations Platform (Supabase)

Built a full-stack showroom operations system on Supabase (PostgreSQL) — enabling 50+ branches to browse product catalogs, submit stock replenishment orders, and log maintenance requests with role-based access control and real-time tracking.

Technologies: React · Supabase · PostgreSQL · REST APIs

E-Commerce Order Synchronization Engine

Built automated API integrations between Trendyol, WooCommerce, OTO, and warehouse management systems — processing orders in real-time with data transformation, error handling, and formatted Excel/PDF reporting.

Technologies: Python · REST APIs · WooCommerce · Trendyol · OTO

Automated Reporting & Data Pipeline

Engineered automated ETL pipelines using Python, VBA, and Power Query — consolidating multi-source data into a master reporting framework and reducing daily reporting effort from several hours to minutes.

Technologies: Python · VBA · Power Query · ETL · Excel

TECHNICAL SKILLS

ERP & Business Systems	Microsoft Dynamics 365, GoFrugal POS, Multi-Branch Operations Management, Inventory & Supply Chain Systems, ERP Workflow Automation
Data & Analytics	Custom Dashboard Development (Chart.js, JavaScript), KPI Dashboards & Executive Reporting, DAX, Power Query, Data Modeling, ETL Pipelines
Development & Automation	Python, VBA, REST APIs, JavaScript, React, Supabase, Firebase, SQL, PostgreSQL, Puppeteer
Infrastructure & Cloud	Google Cloud Platform (GCP), Firebase, Supabase, Cloud Functions, RESTful APIs, System Architecture, CDN, GitHub, Windows Server, LAN/WAN

Education BSc Information Technology, Arab Open University (2015–2020) | GPA: 3.7 / 4.0

Languages Arabic (Native) | English (Professional Working Proficiency)
